- Collaborate with the IT team to ensure the security and integrity of the company's network.
- Assist with the installation, configuration, and maintenance of operating systems and server applications.
- Monitor system performance and assist in resolving issues.

### PROJECTS

#### WorkWeave – Developer

- Developed a Job board where the admin can post Jobs and applicants can find Jobs related to their skills and apply for them.
- Used Django framework to develop the application. [Github Link](#)

#### Student Affairs Management System

- Developed a University Student's complaint, compliments and suggestions management system using Django framework with HTML, CSS, Bootstrap front-end and Python on backend. [Github link](#)

#### Graphics Designs

- I am also proficient in using Adobe Photoshop to create various card designs and posters and also video editing. [Google drive link](#)

### COMMUNITY INVOLVEMENT

#### Member – Computer Society of Kirinyaga

Participate in club activities by collaborating with other team members to develop innovative technologies within the University.
